

ULYDIA

PRESS KIT

The data behind career guidance

ULYDIA is a career guidance platform connecting occupations, programmes, qualifications and institutions. It serves 15-25 year-olds building their plans, schools presenting their programmes, and companies seeking visibility before the first job.

ULYDIA documents occupations, programmes, qualifications and institutions for 15-25 year-olds, in five languages across 249 territories. This document gathers the figures from our database, their definitions and our sources, so you can cite them without having to ask us.

Figures as of 2026-09-12

Press contact press@ulydia.com

Key figures

1,617

occupations in the reference set

Reference occupation profiles, each localised for every covered territory.

249

territories covered

Countries and territories with a local version of the occupation profiles.

347,918

programmes listed

Programmes drawn from official registries, published and browsable. Generic templates excluded.

126,661

institutions

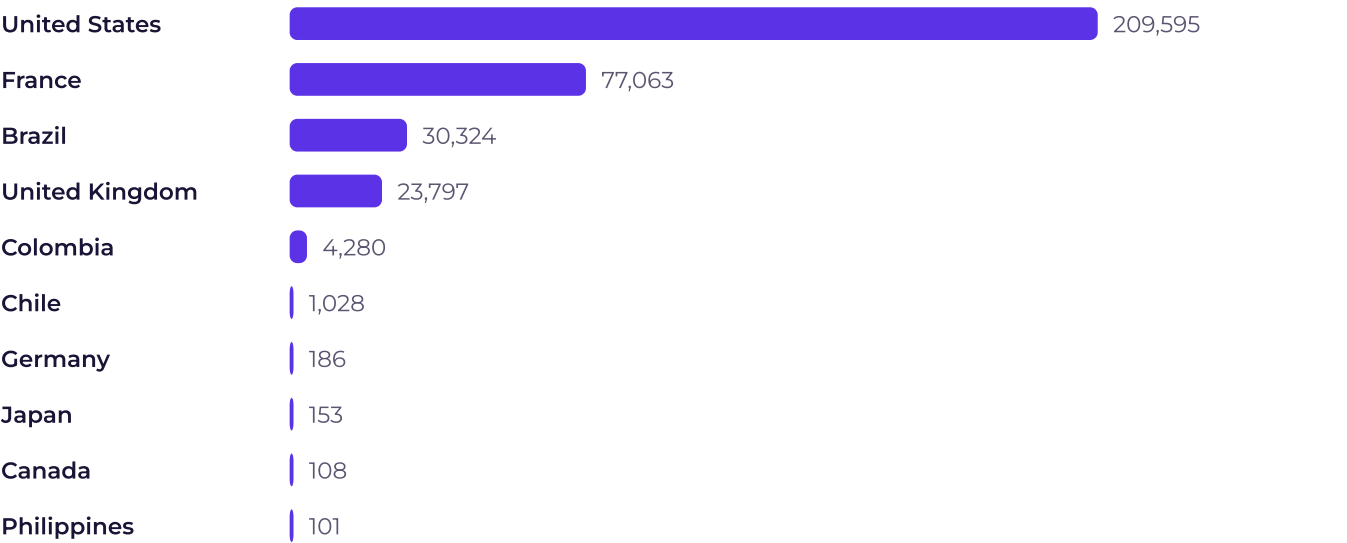

Schools, universities and training providers identified in our database.

How to read these figures. The 1,617 reference occupations are localised across each of the 249 territories, giving 401,861 occupation-country profiles. These are not 401,861 distinct occupations: each version carries the local currency, that country's pay ranges and the entry routes practised there.

Programmes by country

Our catalogue of programmes drawn from official registries covers 63 countries. Depth varies considerably between countries: it follows the availability of open data and the integration schedule of each national registry.

Uneven coverage, openly stated. Six countries account for most of the catalogue, because their registries are open and usable: IPEDS in the United States, France Compétences and ONISEP in France, INEP in Brazil, HESA in the United Kingdom. Coverage widens as further registries are integrated and as institutions claim their profiles.

COUNTRY	PROGRAMMES	INSTITUTIONS
United States	209,595	31,111
France	77,063	66,461
Brazil	30,324	2,702
United Kingdom	23,797	822
Colombia	4,280	447
Chile	1,028	142
Germany	186	564
Japan	153	1,563
Canada	108	596
Philippines	101	583
53 other countries	1,283	

Qualifications

The qualifications catalogue is built country by country, from the official nomenclature of each education system. Four countries have been documented in detail; the others rely on a generic base pending integration of their national registry.

COUNTRY	QUALIFICATION TYPES	SPECIALISATIONS
France	34	2,628
United States	62	1,733
India	240	1,234
United Kingdom	22	311

Our sources

- France Compétences — national register of professional certifications (RNCP), France only
- ONISEP — French programmes and institutions
- IPEDS — United States higher education institutions
- HESA — United Kingdom higher education
- INEP — Brazilian higher education

What this data is not. It is neither a ranking nor an assessment of the quality of programmes or institutions. Pay ranges are orders of magnitude by occupation and country, not individually observed salaries. We provide the source of any figure on request.

What the platform offers

Three audiences, one shared data foundation.

For students

Explore an occupation before choosing a programme.

- Localised occupation profiles: pay, entry routes, prospects
- Programme catalogue and institution directory
- AI-assisted guidance
- Events, fairs, internship and apprenticeship offers

For schools and universities

Claim your profile and present your programmes.

- Institution page and programme publishing
- Application tracking and built-in messaging
- Events and open days
- Consultation statistics

For companies

Appear where occupations are discovered.

- Occupation sponsoring and careers page
- Internship, apprenticeship and entry-level offers
- Application tracking and messaging
- Events and visibility statistics
